Dear . . .

By: Jesper Christiansen

Day 103

Dear diary

Niklas called and told me his side of things today. He had tried to call earlier but the command has closed the phone lines as they had to prepare instead of focusing on their civilians. Niklas says he had watched a lot of movies as a kid about aliens attacking the earth but he did not believe them to be evil in real life. Thanks to him, I am now worried about us as I have never seen any alien movie but the tv is not showing anything else other than movies or news. I wonder what will happen next as the aliens have still not landed or shown any signs of life but the airforce has been flying around the UFO like ants on an ant-hill. I overheard the tv mention the scientist who was the one who had discovered that the comet was not a comet but an advanced form of transportation of the aliens. The rock has placed itself between the moon and the earth so it was super easy to spot now while the UFO was only a small part of the big object. Scientists around the world were now trying to be the first to pick up the radio-waves from the ship or should I say ships as in my craziness I forgot to mention that since they arrived at our capital 2 days ago, UFO's have appeared near other capitals, from Tokyo, to Beijing, and even as far away as Berlin. I am having a hard time sleeping but the parents who bring their kids to the kindergarten look even worse so I keep forcing myself to work even though I want to stay home just in case that Niklas calls.

Good night diary.
